

Connecting RPA Bots to AI Models

The dominant white-collar automation architecture of 2026. LLMs made classification + extraction commodity; RPA made clicking commodity. Stitching them is the play.

Which inbox in your life screams for triage automation?

WHAT'S INSIDE

- 01** The pattern — AI + RPA
- 02** Three trigger archetypes
- 03** Calling the model from the bot
- 04** Human-in-the-loop — where it lives
- 05** 30-line email triage bot

WHY THIS LESSON MATTERS

AI decides. RPA acts. Humans watch.

WHY

Real

A real reason this matters in industry today.

SCALE

Today

A real reason this matters in industry today.

SPEED

Now

A real reason this matters in industry today.

IMPACT

Yours

A real reason this matters in industry today.

LEARNING OUTCOMES

By the end of this lesson, you will be able to —

1

The AI-decides / RPA-acts pattern.

2

Design an intelligent trigger.

3

Call an AI model from UiPath / Power Automate / pyautogui.

4

Route uncertain outputs to human review.

5

Build a 30-line email triage bot.

AGENDA

What we'll cover today

Short, sequenced parts. Each one builds on the last.

01

The pattern — AI + RPA

One decision, one action

02

Three trigger archetypes

Every enterprise automation opportunity maps to one of these three.

03

Calling the model from the...

Universal bridge — HTTP

04

Human-in-the-loop — where...

Between AI decision and RPA action

01

PART 1 OF 4

The pattern — AI + RPA

One decision, one action

CONCEPT 1 OF 4

The pattern — AI + RPA

AI: classify, extract, score.

RPA: click, type, paste, post.

Bridge: HTTP call from the bot to the model.

Human-in-the-loop for low confidence.

PATTERN

AI → RPA

Dominant enterprise automation architecture of 2026.

DEFINITION

The pattern — AI + RPA

One decision, one action

EXAMPLE

Real-world example: applies directly to Indian industry contexts.

Three trigger archetypes

Every enterprise automation opportunity maps to one of these three.

KEY POINTS

- Every enterprise automation opportunity maps to one of these three
- Practical, named, applied to a real Indian use-case.
- Practical, named, applied to a real Indian use-case.

CONCEPT 3 OF 4

Calling the model from the bot

UiPath: HTTP Request activity → OpenAI / your FastAPI.

Power Automate: AI Builder / Azure OpenAI connectors.

Python (pyautogui, playwright): anthropic / openai SDK inline.

Always set timeout + retry — outages are normal.

ALWAYS

Timeout + retry

Model outages are transient — retry, never crash.

DEFINITION

Calling the model from the bot

Universal bridge — HTTP

EXAMPLE

Real-world example: applies directly to Indian industry contexts.

CONCEPT 4 OF 4

Human-in-the-loop — where it lives

If confidence < threshold → queue for human.

Critical actions (refunds > ₹10k) → always human.

Log raw model input + output for audit.

Human corrections feed back into few-shot examples.

PLACE

Before RPA commits

Catch errors BEFORE the bot changes the system of record.

KEY POINTS

- If confidence < threshold → queue for human
- Critical actions (refunds > ₹10k) → always human
- Log raw model input + output for audit
- Human corrections feed back into few-shot examples

02

PART 2 OF 4

Engage and reflect

Pause, talk, and connect what you just learned to your own work.

✦ THINK • PAIR •
SHARE

ACTIVITY

Design a support-ticket triage

PROMPT

Apply the four concepts above to one real example from your own week.

HOW TO RUN IT

- 1
- 2 Design: AI classifies, bot routes, human gates the sensitive 15%.
- 3 Best design wins the podium.
- 4 Reveal: instructor confirms the canonical answer.

REFLECT & APPLY

Three questions before you close this lesson

Spend 60 seconds on each. Write the answers down — no scrolling, no shortcuts.

Q1

Which of your workflows fits the AI → RPA pattern today?

Q2

What confidence threshold would you choose — and why?

Q3

Where would the auditor demand logs?

03

PART 3 OF 4

Knowledge check

Three short questions. One minute each. Honest answers only.

Pattern in one line:

A

AI + AI

B

AI decides, RPA acts

C

RPA decides, AI acts

D

No AI

Pattern in one line:

CORRECT ANSWER

AI decides, RPA acts

WHY

AI outputs a decision; RPA performs the physical action

Universal bridge between RPA and a model:

Database

HTTP

File share

Email

Universal bridge between RPA and a model:

CORRECT ANSWER

HTTP

WHY

HTTP request → model endpoint. Every RPA tool supports it

Human review belongs:

A

Never

B

At the start

C

Between AI and RPA

D

At the end

Human review belongs:

CORRECT ANSWER

Between AI and RPA

WHY

Catch mistakes BEFORE the bot commits

04

PART 4 OF 4

Apply and close

One thing to remember. One thing to ship this week.

SUMMARY

Five sentences to remember

If you remember nothing else from this lesson, remember these five lines.

- 1 Pick the right tool — never the loudest one.
- 2 Practice the framework on a real example.
- 3 Watch for the three classic pitfalls.
- 4 Document your decision in one sentence.
- 5 Carry the discipline forward to the next lesson.

WORKED EXAMPLE

How this lesson plays out in one real Indian context

THE SCENARIO

AI: classify, extract, score.

RPA: click, type, paste, post.

Bridge: HTTP call from the bot to the model.

Human-in-the-loop for low confidence.

PATTERN

AI → RPA

Dominant enterprise automation architecture of 2026.

THE TAKEAWAY

"That is the white-collar automation architecture of 2026."

WHAT TO NOTICE

1

The pattern — AI + RPA

2

Three trigger archetypes

3

Calling the model from the...

4

Human-in-the-loop — where...

Mini assignment — email triage

Build the 30-line bot on your own Gmail inbox.

DELIVERABLES

- Poll UNSEEN messages.
- LLM classify by subject.
- Auto-file into one of 3 folders.
- Log every action.

WHAT 'GOOD' LOOKS LIKE

Deliverable: Screen recording + repo URL.

ONE THING TO REMEMBER

“

"That is the white-collar automation architecture of 2026."

— AI Learning Hub

END OF LESSON 4

What you can now do

Each one of these is now part of your working vocabulary.

- 1 Pick the right tool — never the loudest one.
- 2 Practice the framework on a real example.
- 3 Watch for the three classic pitfalls.
- 4 Document your decision in one sentence.
- 5 Carry the discipline forward to the next lesson.

NEXT → Projects — Saturday. Ship three artefacts.
