

Interviews, logs and the silent majority

When you ask "Do you like this AI?" users say yes. When you watch logs, they use it once and leave. AI user-research demands a mix of stated and revealed preference — interviews + telemetry + shadow-traffic.

Have you used an AI feature this week that you would NOT recommend to a friend?

WHAT'S INSIDE

- 01** 5 methods for AI features
- 02** AI interview — 5-question script
- 03** Log mining for intent
- 04** AI-specific biases to watch
- 05** Research brief — 6 fields

WHY THIS LESSON MATTERS

Users lie about AI — not intentionally, but consistently.

WHY

Real

A real reason this matters in industry today.

SCALE

Today

A real reason this matters in industry today.

SPEED

Now

A real reason this matters in industry today.

IMPACT

Yours

A real reason this matters in industry today.

LEARNING OUTCOMES

By the end of this lesson, you will be able to —

1

5 research methods with AI-edge.

2

Run an AI-feature interview.

3

Mine logs for user intent clusters.

4

Recognise AI-specific bias in feedback.

5

Research brief for a feature.

AGENDA

What we'll cover today

Short, sequenced parts. Each one builds on the last.

01

5 methods for AI features

Key concept of this lesson.

02

AI interview — 5-question...

Short, behaviour-anchored

03

Log mining for intent

Free signal hiding in plain sight

04

AI-specific biases to watch

Key concept of this lesson.

01

PART 1 OF 4

5 methods for AI features

Key concept of this lesson.

5 methods for AI features

A core idea you'll use throughout this lesson.

DEFINITION

5 methods for AI features

EXAMPLE

Real-world example: applies directly to Indian industry contexts.

AI interview — 5-question script

Walk me through the last time you used it.

What did you expect it to do?

What did you do when it got it wrong?

Which step would you skip if you could?

When did you stop trusting it?

SCRIPT

5 Qs

Behaviour > opinion.

KEY POINTS

- Walk me through the last time you used it
- What did you expect it to do?
- What did you do when it got it wrong?
- Which step would you skip if you could?

Log mining for intent

Cluster prompts by embedding similarity.

Tag top clusters with intent labels.

Map intent → success rate.

Lowest-success cluster = next PRD.

METHOD

Cluster → intent

Telemetry is free research.

DEFINITION

Log mining for intent

Free signal hiding in plain sight

EXAMPLE

Real-world example: applies directly to Indian industry contexts.

AI-specific biases to watch

A core idea you'll use throughout this lesson.

KEY POINTS

- A core idea you'll use throughout this lesson
- Practical, named, applied to a real Indian use-case.
- Practical, named, applied to a real Indian use-case.

02

PART 2 OF 4

Engage and reflect

Pause, talk, and connect what you just learned to your own work.

✦ THINK • PAIR •
SHARE

ACTIVITY

Run a 10-minute AI interview

PROMPT

Apply the four concepts above to one real example from your own week.

HOW TO RUN IT

- 1
- 2 Interview partner for 10 min.
- 3
- 4 Reveal: instructor confirms the canonical answer.

REFLECT & APPLY

Three questions before you close this lesson

Spend 60 seconds on each. Write the answers down — no scrolling, no shortcuts.

Q1

Which bias most distorts your current feedback loop?

Q2

What log-cluster would reveal an unasked-for feature?

Q3

Do you trust stated or revealed preference more? Why?

03

PART 3 OF 4

Knowledge check

Three short questions. One minute each. Honest answers only.

AI novelty bias causes:

A

Under-rating

B

Two weeks of inflated ratings

C

No effect

D

Only abroad

AI novelty bias causes:

CORRECT ANSWER

Two weeks of inflated ratings

WHY

Ratings settle after novelty

Wizard-of-Oz tests:

A

Model accuracy

B

Pre-model demand

C

CPU

D

Latency

Wizard-of-Oz tests:

CORRECT ANSWER

Pre-model demand

WHY

Prove demand before building

Best signal for intent at scale:

A

Interviews

B

Log mining

C

Surveys

D

Offsite

Best signal for intent at scale:

CORRECT ANSWER

Log mining

WHY

Clusters on real prompts

04

PART 4 OF 4

Apply and close

One thing to remember. One thing to ship this week.

SUMMARY

Five sentences to remember

If you remember nothing else from this lesson, remember these five lines.

- 1 Pick the right tool — never the loudest one.
- 2 Practice the framework on a real example.
- 3 Watch for the three classic pitfalls.
- 4 Document your decision in one sentence.
- 5 Carry the discipline forward to the next lesson.

WORKED EXAMPLE

How this lesson plays out in one real Indian context

THE SCENARIO

A team applies the lesson's main idea to a real workflow — and the results show up within a quarter.

THE TAKEAWAY

"Users will tell you what they think they want; logs show what they do."

WHAT TO NOTICE

1

5 methods for AI features

2

AI interview — 5-question...

3

Log mining for intent

4

AI-specific biases to watch

Interview + brief

Interview 1 user for your Week-10 product.

DELIVERABLES

- Write the 1-page research brief.
- Run 10-minute interview.
- Extract 3 behavioural quotes.
- Document one decision you made because of this lesson.

WHAT 'GOOD' LOOKS LIKE

Deliverable: Brief + quotes on LMS.

ONE THING TO REMEMBER

“

"Users will tell you what they think they want; logs show what they do."

— AI Learning Hub

END OF LESSON 10

What you can now do

Each one of these is now part of your working vocabulary.

- 1 Pick the right tool — never the loudest one.
- 2 Practice the framework on a real example.
- 3 Watch for the three classic pitfalls.
- 4 Document your decision in one sentence.
- 5 Carry the discipline forward to the next lesson.

NEXT → Lesson 5 — Pricing.
